Moroccan Dirham Coin (MADC) Whitepaper

The Moroccan Dirham Coin (MADC) is a visionary cryptocurrency project designed to create a reliable Moroccan stablecoin pegged to the national dirham (MAD). This whitepaper outlines our mission to bridge traditional finance with blockchain innovation, establishing Morocco as a leader in North African cryptocurrency adoption through a transparent, secure, and inclusive digital currency.

Introduction

MADC represents a pioneering initiative in Morocco's financial landscape, aiming to launch the nation's first dirham-pegged stablecoin. Built on the Ethereum blockchain as an ERC-20 token, MADC combines the stability of Morocco's national currency with the innovative potential of decentralized finance (DeFi).

Our project addresses the growing demand for digital financial solutions that maintain connection to local economies while offering the benefits of blockchain technology. By creating a digital asset that mirrors the stability of the Moroccan dirham, we provide both individuals and businesses with a familiar yet forward-looking financial tool.

Vision & Mission

Create Stable Currency

Integrate with DeFi

Morocco Blockchain Leader

Drive Inclusion & Growth

Our vision positions Morocco as the definitive blockchain leader in North Africa through a trusted, dirham-backed digital asset. MADC aims to revolutionize how Moroccans and the diaspora interact with money in the digital age, creating opportunities for innovation, inclusion, and growth across multiple sectors of the economy.
By maintaining a 1:1 peg with the Moroccan dirham, MADC provides stability while unlocking the transformative potential of blockchain technology for everyday financial activities.

Tokenomics

This section outlines the economic framework of the Moroccan Dirham Coin (MADC), detailing its fundamental characteristics, total supply, initial valuation, and strategic distribution plan.

Token Fundamentals

Token Symbol:	MADC
Blockchain:	Ethereum (ERC-20)
Total Supply:	100,000,000 MADC
Initial Value:	1 MADC = 1 MAD

- Community Rewards
- Strategic Partnerships
- Liquidity & Listings
- Development Fund
- Reserve

The pie chart illustrates the initial allocation of the MADC total supply. The largest portion, 40%, is designated for Community Rewards, fostering ecosystem growth and engagement. Strategic Partnerships and Liquidity & Listings each receive 20%, ensuring strong collaborations and market stability. Finally, 10% is allocated to the Development Fund for ongoing innovation, with another 10% held in Reserve for future needs.

Token Distribution Strategy

1

Community Rewards & Airdrops (40%)

The largest allocation supports community building and adoption. 500 MADC will be distributed to early joiners through our initial airdrop campaign, with additional tokens reserved for future community incentives, staking rewards, and loyalty programs.

2

Strategic Partnerships (20%)

Dedicated to forming key alliances with Moroccan businesses, financial institutions, payment processors, and international blockchain projects to accelerate adoption and create a robust ecosystem around MADC.

3

Liquidity & Exchange Listings (20%)

Ensures sufficient market liquidity across decentralized and centralized exchanges, beginning with Uniswap. This allocation maintains healthy trading volumes and price stability as the project scales.

4

Development & Reserve (20%)

Combined allocation for ongoing technical development (10%) and strategic reserves (10%) to ensure long-term project sustainability, fund future innovations, and provide backing for the token's stability mechanism.
Utility of MADC

Stable Store of Value

MADC provides a digital asset pegged 1:1 to the Moroccan dirham, offering stability in the volatile cryptocurrency market while maintaining the familiar value reference of Morocco's national currency.

Seamless Payments

Enables instant, low-cost transactions for individuals and businesses, both domestically and internationally, without the friction of traditional banking systems.

DeFi Integration

Unlocks access to global decentralized finance protocols for lending, borrowing, yield farming, and liquidity provision, creating new financial opportunities for Moroccan users.

Remittances

Provides the Moroccan diaspora with an efficient channel for sending money home, dramatically reducing fees compared to traditional remittance services and accelerating transfer times.

Roadmap

Q3 2025: Foundation Phase

- Smart Contract Deployment & Security Audit
- Token Verification on Etherscan
- Launch Website & Social Media Channels
- Initial Community Building Campaign

Q1 2026: Ecosystem Growth

- Mobile Wallet Integration
- Expansion of Merchant Network
- First DeFi Protocol Integrations
- Launch of Developer Grants Program

1   **2**   **3**   **4**

Q4 2025: Market Entry

- Initial Airdrop Campaign (500 MADC for Early Joiners)
- Listing on Uniswap & CoinGecko
- Partnerships with First Moroccan Businesses
- Community Expansion Events

Q2 2026: Advanced Features

- Cross-chain Bridge Development
- Launch Governance Mechanism
- Centralized Exchange Listings
- International Partnership Expansion

Security & Compliance

MADC prioritizes security and regulatory compliance throughout its development and operation. Our approach combines technical safeguards with forward-looking regulatory engagement:

Smart Contract Security

All contracts undergo rigorous third-party audits by leading blockchain security firms before deployment, with results published publicly for transparency.

Regulatory Engagement

We maintain open dialogue with Moroccan financial authorities to ensure alignment with emerging cryptocurrency regulations and contribute to responsible policy development.

MADC implements multi-signature requirements for treasury operations, regular security assessments, and maintains transparency through detailed documentation of all security practices and reserve holdings.
